MANUAL GigaBlue BOX

Initiation

Dear Customer,

thank you have decided to purchase the one GigaBlue HD Quad Plus.

This manual should help you to connect your GigaBlue box properly and to get to know the numerous functions better.

The GigaBlue HD Quad Plus is a world first with a fast 2 x 1.3 GHz processor, 1GB of memory, adapters and a color LCD screen; the possibilities of this multimedia box are very extensive. They are reached by fast Gigabyte LAN in your private and external network the highest performance. Furthermore, in software MediaPortal is integrated.

You can use the GigaBlue Box as your Web browser, photo archives, music archives, film archive and many other functions.

You can adjust the GigaBlue box according to your wishes via plugin Service.

We hope you will enjoy reading the manual, and of course in the use of your GigaBlue HD Quad Plus.

Should a problem with your GigaBlue HD Quad Plus occur please download <http://www.gigablue.de> under down the service request form and fill it out completely.

General Information

You can view the GigaBlue Box numerous HD and SD programs, are sent via satellite optional DVB-C / T. In this manual the installation of GigaBlue box and the procedure for implementation will explain various functions. In addition, special functions are explained in details which are available only at the box GigaBlue. So you can use these functions optimally. The skin shown here is the default skin, in other skins only the graphical user interface, but the function remains the same changes.

Key Features

- Fully compatible with MPEG-2/4 and DVB-S / S2
- Resolution: 1080p, 1080i, 720p, 576p, 576i
- Digital Audio with AC-3 support by SPDIF
- User-friendly, on-screen menu system Linux
- Various channel editing functions
(Favorites, Lock, Rename, Delete and Sort)
- Automatic search for newly added transponders
- (automatic network search)
- Easy and fast software upgrade via USB or Internet
- Timer function, automatic on / off with the appropriate setting of the function (once, daily, weekly and monthly)
- Automatic system for moving bookmarked channels
- Electronic TV / Radio program (EPG)
- Video connectors: HDMI, RCA, COMPONENT
- RS-232
- Different switch types, LNB types and NTSC / PAL monitor types
- SCPC and MCPC receivable from C / Ku band satellite
- Multi LNB controlled by DiSEqC 1.0, 22 kHz
- Automatic PAL / NTSC conversion
- Last channel is automatically saved
- Play multimedia files like MP3, videos and pictures in HD quality
- PVR on HDD or Network
- Media Portal, Streaming
- Timeshift (time shifting)
- Plugin Service (extensions)
- HDMI CEC control
- PiP (Picture in Picture)
- Built-in UPnP server / client
- Web Browser
- IP TV, IP Radio

Operation of GigaBlue Box

Create Bouquet

What is a bouquet and what can that mean?

When you open your browser, you will definitely have websites that are visited by you, they have you determined your favorites stored under a folder to start it later quickly. The principle at the bouquet is exactly the same. Do you want to have all your sports channels in a folder, create a bouquet and copy the individual channels of the bouquet. Must be to create the bouquet option under **Customize** on Several Bouquet allow set to **YES** (page 44). **Create Bouquet** is described below.

Note: Channels can be erased only in the Favorites view. Channels in the All can not be deleted. This serves the purpose of which there is a list of the always all channels. If you will perform a search, all channels are all stored in the view. Your previously created bouquets, remain unaffected.

Press the arrow buttons ▲ ▼ on the remote control. This opens the channel list. Then press the **BLUE** button **FAVOURITES** Fig1.

Now press the **Menu** button and you will see the channel lists menu Fig.2.

Please choose **add bouquet**

Assign the name for the new **bouquet**, in our case, test Fig.3.

Confirm with **OK** and you will see your created Bouquet Fig.4.

Operation Audio/Video Settings

Audio settings

Here you can make settings on the audio and video settings.

To make settings on the Audio / Video switch to the menu,

Setup / Audio / Basic Settings

Video output

Video output:

This determines where the video signal to be output. The options are:

HDMI

YPbPr

Use the arrow keys to select ◀▶ the desired output.

Modus:

The following options are available:

PAL

NTSC

Make this a country-specific. Use the arrow keys ◀▶.

Refresh rate:

In normal TV devices only options 50Hz, 60Hz and Multi are available. If your TV is connected via HDMI or YPbPr you can vote the interface screen for your TV device.

Aspect ratios

Modus 4:3

16:9 View content as

Letterbox:

Here the program will be on a 16: 9 TV display device, however, arise the left and right black bars over its full height.

Just Scale:

The show will be on a 16: 9 TV equipment in the whole amount but shown slightly distorted width.

Pan&Scan:

The show will be on a 16: 9 TV equipment in its entire width but below and above a portion of the image is cut off.

Operating Audio / Video Settings

Aspect ratios

Modus 16:9

4:3 View content as:

Pillarbox:

Here the program will be on a 16: 9 TV display device, however, arise the left and right black bars over its full height.

Just Scale:

The show will be on a 16: 9 TV equipment in the whole amount but shown slightly distorted width.

Nonlinear:

The outer portion of the image is slightly distorted, so, a perfect image is shown in the inner area, in full screen mode.

Pan&Scan:

The show will be on a 16: 9 TV equipment in its entire width but below and above a portion of the image is cut off.

Modus 16:10

As described above

Color format

The following formats are available:

RGB (RED, GREEN, BLUE)

CVBS (Separated color and luminance signal)

Select the appropriate format.

WSS 4:3

If this option is activated, for TVs 16: 9 zooming of 4: 3 broadcasts prevented.

AC3 Standard

Set here whether AC3 (Dolby Digital) should be on or off. Use arrow keys ◀▶.

Operation Network Settings

Network settings

Go to the menu
**Setup / System / Network /
Basic Settings** to configure
your network to Fig.1.

If a DHCP server on your
network, you can change the
settings to take Fig.2.
Use the arrow keys ◀▶ to a
Static address assigned Fig.3.
Save Press the OK button
the settings.Abb.1

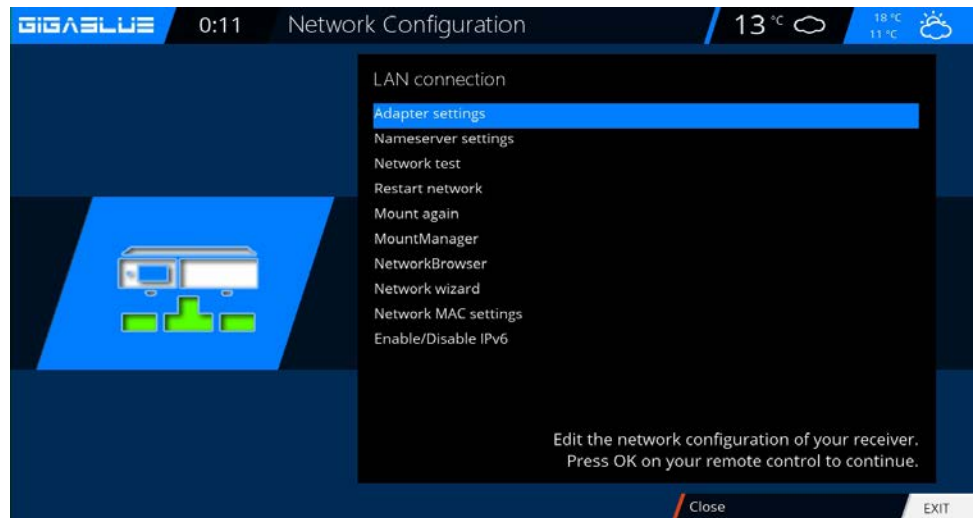

Fig.1

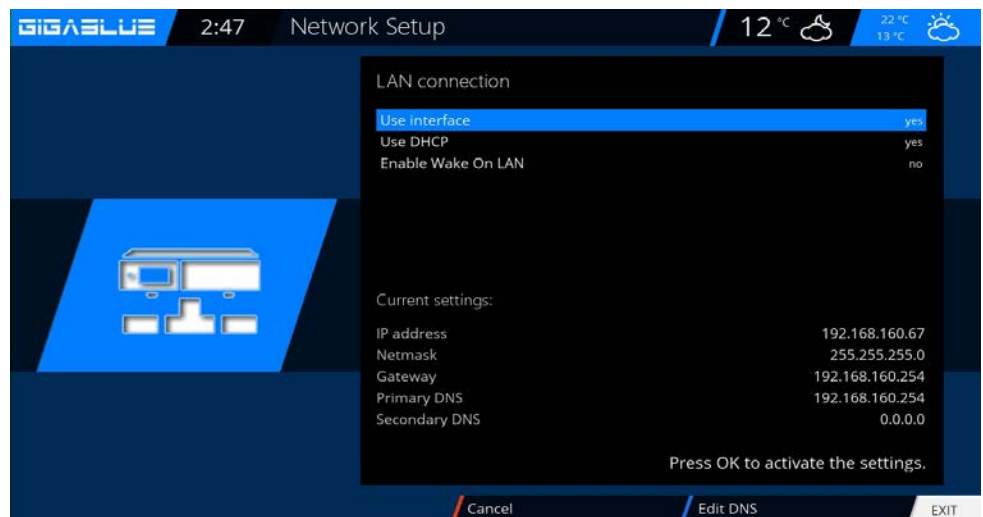

Fig.2

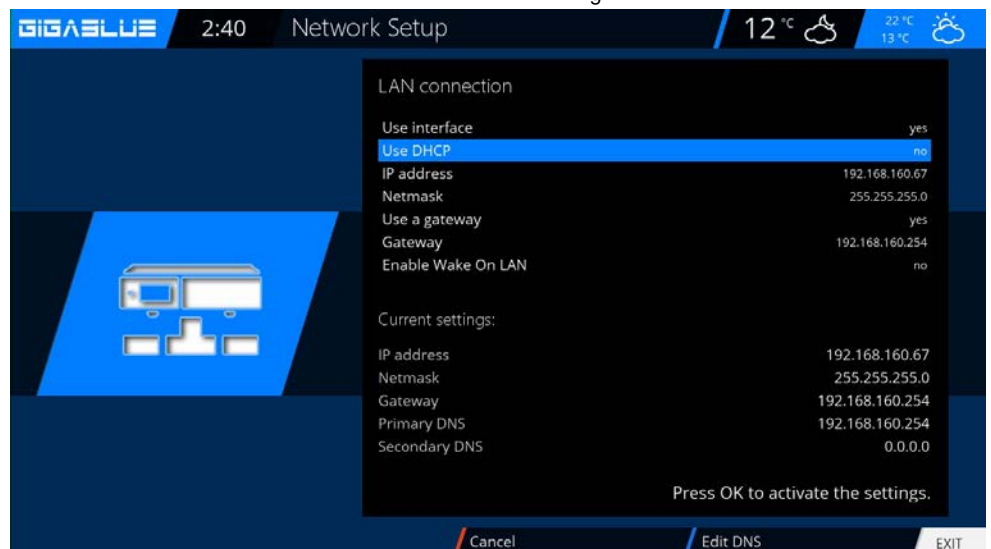

Fig.3

Operation Network Settings

Network Settings

The following options are available:

Enable Network Adapter:

You can disable or enable the adapter for a wired network.

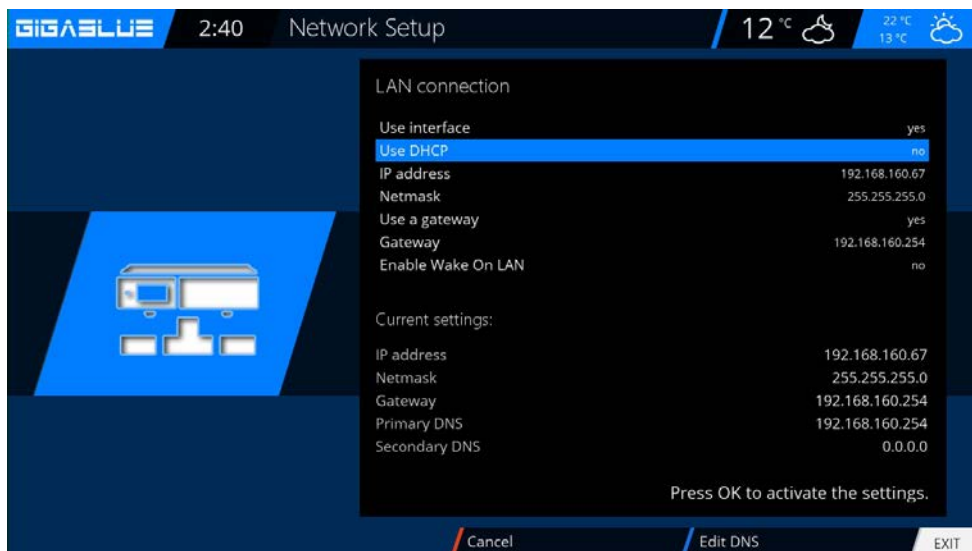

Address automatically (DHCP):

Determine whether the network address is automatically obtained from a DHCP server.

IP Address manually assigned.

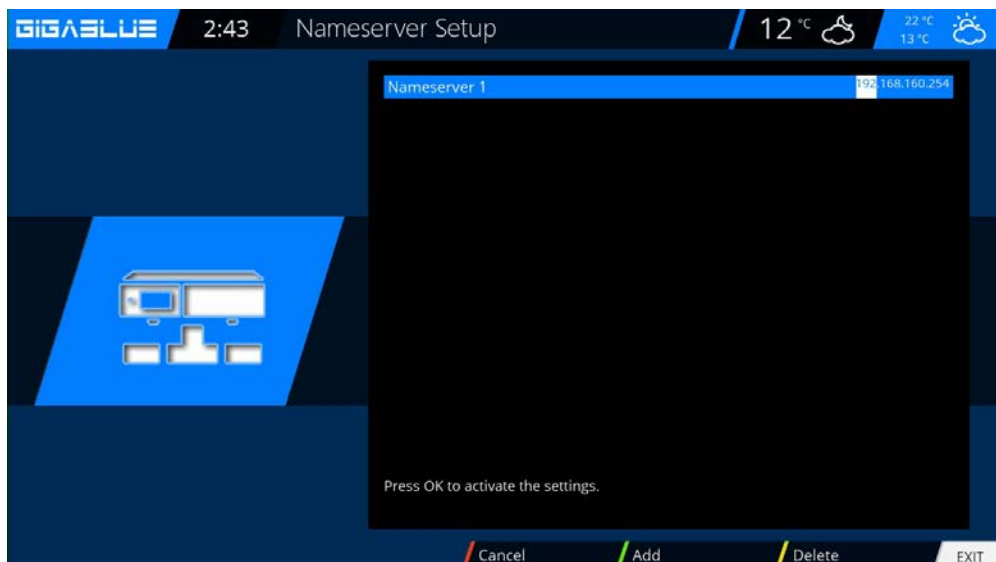

Do you want to assign the IP Address manually to set the DHCP server on No. Now enter the IP address (that matches your network pool), and the network mask (**default setting 255.255.255.0**).

After that it's important to also set the gateway to **YES**, you now assign the gateway address. See figure. Accept the input by pressing the **OK** button.

DNS-Setting:

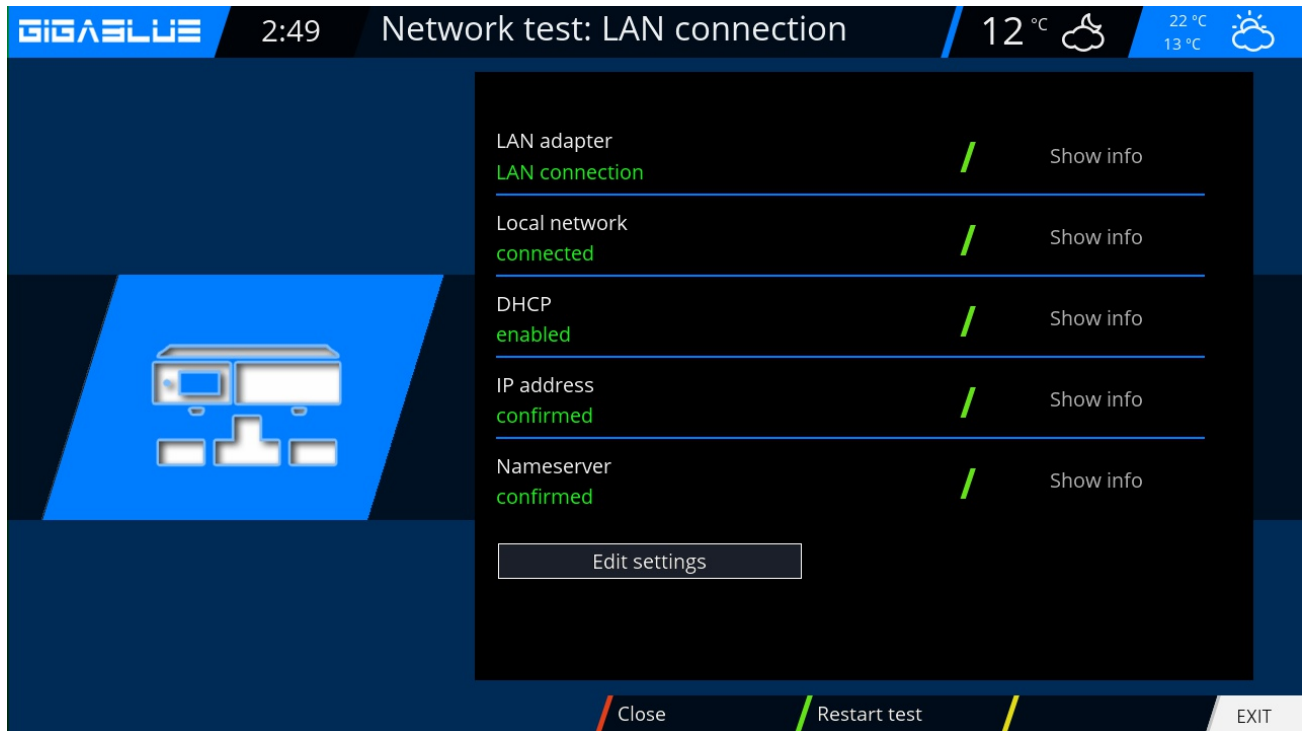

Next, enter the DNS address and save with **OK**. See figure.

Operation Network Settings

Network settings

After successful network setting you can check this.

The test is started with the **GREEN** button.

GREEN means successfully **RED** unsuccessful. As the DHCP is disabled and no approvals for the internal network are available they are displayed in **RED**. To exit, press the **RED** button.

Restart Network:

With this option, you can restart the network configuration of your GigaBlue box.

Network Assistant:

The network wizard will assist you in the settings of your network.

Operation Network Settings

WLAN setting

Go to **Menu / Setup / System / Network** Abb1.

Now go to **wireless connection** and click **OK** to confirm Fig.2

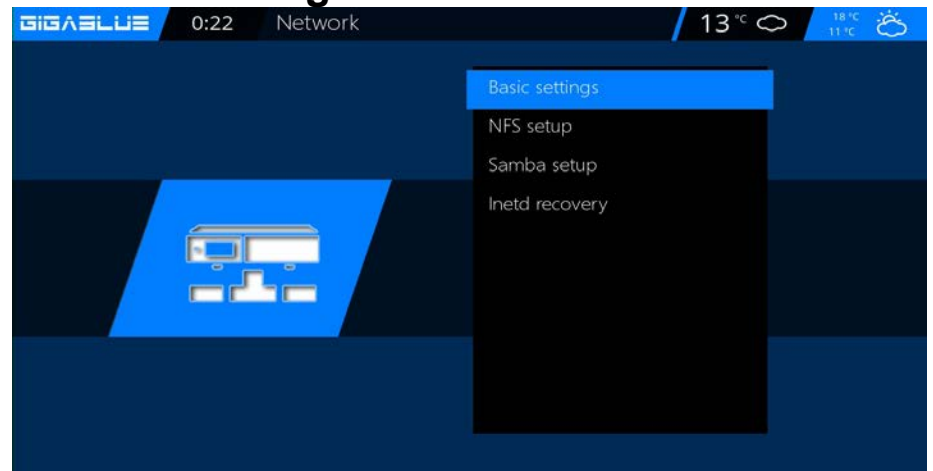

Fig.1

Now activate the **Wi-Fi adapter**, Fig.3,
Use the arrow keys ◀▶ confirm with **OK**. Now, the wireless network is enabled. This may take several seconds

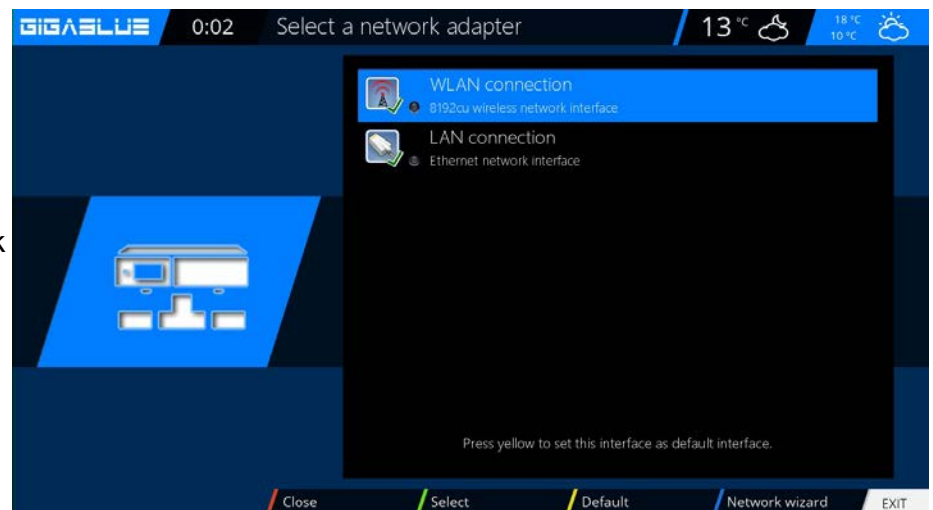

Fig.2

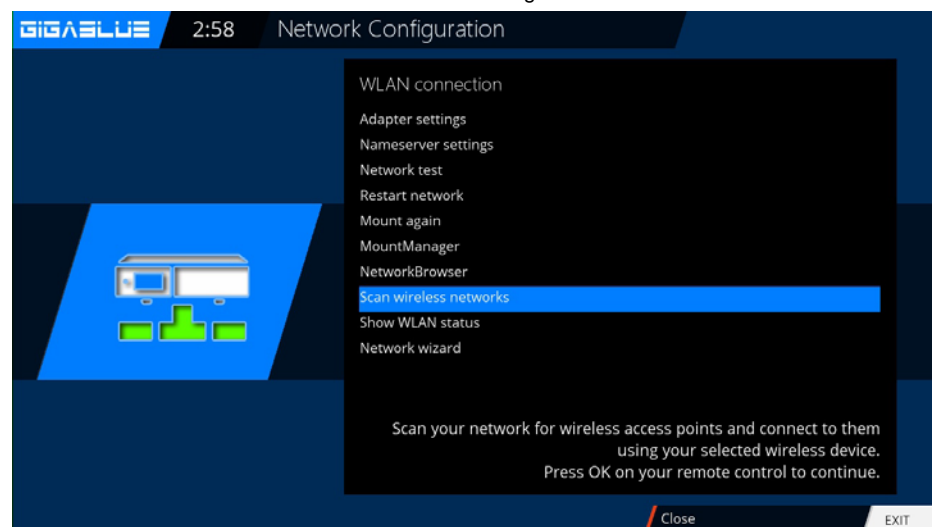

Fig.3

Operation Network Settings

WLAN setting

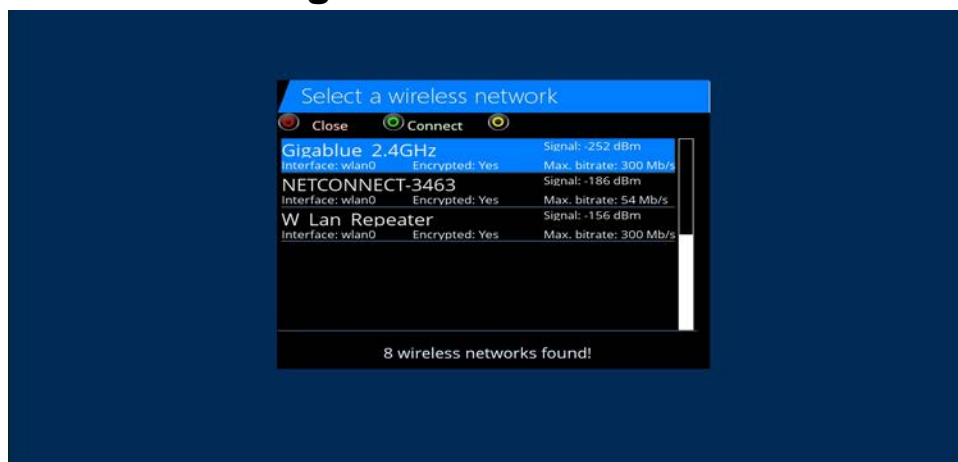

Fig.4

Now activate the **Wi-Fi adapter**, use the arrow keys ◀▶ confirm afterwards with **OK**. Abb.5, Select encryption WPA and WPA2 Then enter your security key. Fig.5. With the **TXT** button to enter the Virtual Keyboard Fig.6 After entering confirm with the **GREEN** Button

Fig.5

Now you press the **OK** button to save Wlan This may take a few seconds. and start GigaBlue new. Now the wireless network should be available to

Technical Specifications

Technical Specifications

General Information:

- Operating System Linux
- Processor 1,3 GHz Mipsel Dual Core
- Kernel 3.x.x.x
- Ram: DDR3 1024 MB
- Flash: 512 MB
- MPEG-2 / MPEG-4 Part 10 / H.264
- 2 x DVB-S/S2 integrated and 2 x Tuner DVB-C/T (optional)
- Color LCD-Display 3,5 “
- Video PAL/NTSC 480p/576p/720p/1080i/1080p
- 1 x HDMI output
- Digital Audio AC3 output SPDIF
- 1 x RS-232
- Composite with Macrovision
- 4 x USB 2.0 (3 X rear / 1x front)
- 10/100/1000 Mbit Networkadapters
- 2 x CI Slot
- 2 x Card reader
- E-SATA intern (for 2,5 “ HDD) and extern e.g. HDD, DVD, Blue-Ray etc.
- USB PVR Ready

Technical Specifications

Technical Specifications

Supplementary Infos:

Output Digital:

Output level 0,5 V an 75 Ohm
Abtastfrequenz 32 kHz, 44.1 kHz, 48 kHz
SPDIF Output optisch

Output Video:

Output level FBAS 1 V +/- 0.3 dB an 75 Ohm

Video-Parameter:

Input level FBAS 1 V +/- 0.3 dB an 75 Ohm
Teletext filtering corresponding ETS 300 472 Standard

TV-Scart:

Output: FBAS, RGB selectable via OSD

Ethernet:

10/100/1000 Mbit compatible Network interface, WLAN possible via USB

USB:

4 x USB 2.0 port, (3 rear / 1 front)

LNB power supply to the Tuner:

LNB Current 500mA max. ; Short Circuit protection
LNB Voltage vertical < 14V no load, > 11,5V at 400mA LNB
Voltage horizontal < 20V no load, > 17,3V at 400mA LNB
Shut off Standby-Mode

Number of active Satellite positions:

DiSEqC TM 1.0/1.1/1.2 und USALS (Rotor-Control)

External Power supply input voltage:

Input: 110-240V AC / 50-60Hz / 0,6A
Output: 12V / 4A

Power consumption:

Normal: 15W (STB PIP: 10.5W, LNB: 4.5W) –if 1 DVB S Tuner used Standby mode: 9.3W
Deep Stand-by Mode: 0.5W

General:

Ambient temperature +15°C...+35°C
Humidity < 80%
Dimension (W x D x H): 300 mm x 240 mm x 63 mm
